

Model:

WP9133 IP67 4.0 Plastic Housing Lora Sensor Plastic Housing

Type	
Model	WP9133
Dimensions	130*90*25mm
Material	Szomk
Weight	g / Maximum Weight
Power Consumption	Power Consumption / Maximum Power Consumption
Operating Temperature	Operating Temperature Range
Storage Temperature	-45 °C 85 °C
Life Span	100000 Cycles
Protection Level	IP67

The plastic housing is designed to protect the sensor module from dust, moisture, and mechanical damage. It is suitable for outdoor use in various environments. The housing is made of high-quality plastic and is resistant to UV radiation. The housing is designed to be easy to install and remove. The housing is compatible with the Lora sensor module. The housing is available in different colors. The housing is available in different sizes. The housing is available in different materials. The housing is available in different finishes. The housing is available in different shapes. The housing is available in different colors. The housing is available in different sizes. The housing is available in different materials. The housing is available in different finishes. The housing is available in different shapes.

Notes:

- 1. The plastic housing is not suitable for use in high-temperature environments.
- 2. The plastic housing is not suitable for use in high-humidity environments.
- 3. The plastic housing is not suitable for use in high-pressure environments.
- 4. The plastic housing is not suitable for use in high-vibration environments.
- 5. The plastic housing is not suitable for use in high-impact environments.
- 6. The plastic housing is not suitable for use in high-chemical environments.
- 7. The plastic housing is not suitable for use in high-radiation environments.
- 8. The plastic housing is not suitable for use in high-magnetic environments.
- 9. The plastic housing is not suitable for use in high-electric environments.
- 10. The plastic housing is not suitable for use in high-temperature environments.
