Weight: 8g
Model No. AK-R-141

Size: 2.36*1.26*0.35 inch
60*32*9 mm

SZOMK

The image shows two white, oval-shaped plastic components, likely parts of a medical device. The component on the left is shown from the inside, revealing a central rectangular opening and several curved, raised structures. The component on the right is shown from the outside, featuring a smooth, slightly textured surface and a small, curved handle-like structure on one side. Both components have a thick, rounded rim.
