

|                |                                                                      |
|----------------|----------------------------------------------------------------------|
| Product Name   | Plastic waterproof enclosure junction box with drilling              |
| Model Number   | AK-B-G212MF-1                                                        |
| External Size  | 145*91*56.5MM                                                        |
| Material       | PC                                                                   |
| IP level       | IP65                                                                 |
| Type           | Connection Junction Box                                              |
| Advantage      | Sealed enclosure with the flanges for wall mounting                  |
| Function       | Provides protection against dust and moisture                        |
| Feature        | It possesses wear resistance, corrosion resistance, aging resistance |
| Application    | Outdoor electrical equipment and PCB protective enclosures           |
| Custom Service | Cuout,logo,color,silkscreen,label ,Acrylic sheet                     |
