

## **80\*65\*37MM AK-BW-11 Electronic Enclosure 4-Way Switch Joint Box Plastic PC IP68 Coaxial Wire Waterproof Cable Junction Box Connector Case**

|                   |                                                         |
|-------------------|---------------------------------------------------------|
| Product Name      | Electrical junction box connectors                      |
| Brand Name        | SZOMK                                                   |
| Model Number      | AK-BW-11                                                |
| Protection Level  | IP68                                                    |
| Type              | Junction Box                                            |
| External Size     | 80*65*37MM                                              |
| Wire Connect Type | 4P                                                      |
| Material          | Shell with PC material, waterproof connector PA66       |
| Color             | Black                                                   |
| Wire section      | (0.5-2.5-3,4)mm <sup>2</sup>                            |
| Min wire size OD  | (4-8/9-12/12-15)mm                                      |
| Supply voltage    | 24A / 450V                                              |
| Application       | Outdoor Power Cord External Sleeve Coupler Protection   |
| Feature           | Strong waterproof,High-quality materials,Wide Usability |

### **Product Features**

Waterproof Junction Box Connector : 4 wire (4-pole) M25 connector, Suitable for cable

diameters of 4-8mm, 9-12mm, 12-15mm.

High quality material: Made of PC material, waterproof, dustproof, impact resistant, durable, sun proof, acid and alkali resistant, and non tearing. It performs very well in all aspects.

High-quality materials : The Electrical Junction Box all are made high quality plastic ,all pass TUV SAA CE ROHS , 100% weatherproof .

Suitable for LED billboards, LED tunnel lights, LED Road landscape lighting, LED outdoor display, LED garden lights, garden spike light and so on. Also, electrical junction box it can be installed in outdoor and indoor areas, gardens, and courtyards, making it very suitable for wiring and cable extension or maintenance. It is also applicable to coastal, river, marine or underwater projects, underground projects, mining projects, solar wind power generation, solar water heaters, and various mechanical equipment.
