Wireless AP Bridge Gateway Switch Housing Smart Home Router Plastic Shell Electronic Equipment Chassis Box AK-NW-81

This is a perfect plastic enclosures for IAQ

*** □VENTS AROUND □**

The design of small vents around it is very conducive to air flow, so as to test the temperature and humidity in the air, particulate matter, and PM2.5, oxygen and other gas monitoring

*** □Ceiling design□**

In this way, it is more convenient to hang on the ceiling, and the ceiling design can monitor a wider range

□Infrared Sensitive Design□

The prominent part in the middle is the infrared sensing function. This product can not only be used as a temperature and humidity sensor for industrial IoT agriculture, etc., but can also test human animals and whether there are people in the room through infrared rays, so as to control the lights or air conditioners to turn off and save energy. , instant noodle energy waste, realize low-carbon life
